## RESEARCH & GRADUATE ASSISTANT EXPERIENCE

---

### Research Assistant, Elizabeth Menninga Fall 2023 – Summer 2024

Worked for a collaborative research team led by Elizabeth Menninga and Alyssa Prorok on cooperation between rebels and governments in civil wars. I converted original data from news reports collected from NexiUni into empirical data by identifying instances of cooperation in the news reports and coding them into the project's main dataset. I conducted quality control checks of other research assistant's converted data to ensure the original data followed strict research guidelines. I also participated in weekly research meetings and assisted in refining coding rules for other research assistants to follow.

### Research Consultant, ISSRC, Frederick Bhoemke Fall 2023 – Spring 2024

Worked as part of a team of graduate student research consultants managed by the Iowa Social Science Research Center that advised and assisted members of the University of Iowa's research community in conducting original research. I specifically provided consulting services for researchers requiring assistance with data management, statistical analysis, and data visualization, including mapping. I constructed workshops, including presentations and practice datasets, to teach individuals the fundamentals of Stata as well as how to visualize data using Stata.

### Editorial Assistant, *American Political Science Review*, Kelly Kadera Fall 2022 - Summer 2023

Worked as the assistant to one of the Associate Editors of *American Political Science Review*, Kelly Kadera. I assisted in reviewer selection and managing the reviewer database for the journal.

### Editorial Assistant, *Foreign Policy Analysis*, Brian Lai Spring 2021 - Summer 2022

Worked under one of the lead editors of *Foreign Policy Analysis*, Brian Lai, to facilitate the publication of manuscripts post-review. I replicated the data analysis of any empirical manuscript accepted for publication in the journal, communicated with authors and editors, assisted in maintaining the journal database of reviewers and submissions, and prepared manuscripts for publication by ensuring document quality. I replicated the results of empirical manuscripts by accessing provided data files, troubleshooting provided code in both Stata and R, and communicating with authors if any issues occurred.
